NEW SILICONE COMPOUNDS FOR BIOMEDICAL USES

TSF is pleased to announce the widening of the already vast range of its product portfolio through the introduction of a new line of silicone compounds for biomedical applications.

Starting from September 2012, the new series “MED – xx” will be available in hardness range between 40 and 70 Shore A, that will utilize polymers properly tested and certified to the requirements of **USP Class VI** (acute systemic toxicity, intracutaneous toxicity, implantation-ability after 120h).

Tests conducted according to **ISO 10993-1** have demonstrated the **bio-compatibility** for cito-toxicity, hemolysis, pyrogenicity, sensitization, dermal irritation, medical devices for implantation till 30 days.

Our technical-commercial staff is at your disposal in case you would like to show us your interest in this new line of products.
